[1] Saginaw, Michigan  
[2] Monday, December 8, 1997  
[3] 1:55 p.m.

REDACTED

[4]  
[5]  
[6] was thereupon called as a witness herein, and after  
[7] having first been duly sworn to tell the truth, the  
[8] whole truth, and nothing but the truth, was examined  
[9] and testified as follows:

**EXAMINATION  
BY MR. KARFIS:**

[10]  
[11] **Q:** Sir, can you please state your name?

[12] **A:** (

[13] **Q:** Let the record reflect this is the  
[14] deposition of \_\_\_\_\_ taken pursuant to notice and  
[15] to be used for any and all purposes as provided in the  
[16] Michigan Court Rules and the Michigan Rules of  
[17] Evidence.

[18] \_\_\_\_\_ have you ever given a  
[19] deposition before?

[20] **A:** No.

[21] **Q:** Okay. I'm going to go over a couple  
[22] rules with you to make this whole process go a little  
[23] smoother for everybody.

[24] The first rule is that when you

[1] **Q:** Is your date of birth \_\_\_\_\_  
[2] **A:** Yes.  
[3] **Q:** And your social security number is

[4]  
[5] **A:** That's correct.

[6] **Q:** And is your current address \_\_\_\_\_

[7] **A:** Correct.

[8] **Q:** \_\_\_\_\_ Okay. And you're  
[9] currently married?

[10] **A:** Yes.

[11] **Q:** And what's your wife's name?

[12] **A:**

[13] **Q:** And that's your wife sitting behind you,  
[14] correct?

[15] **A:** Right.

[16] **Q:** How long have you been married?

[17] **MR. DAVIS:** Don't mess this up.

[18] **MR. KARFIS:** This is to get your  
[19] wife mad at you.

[20] **MR. DAVIS:** But I'll sit between  
[21] you two.

[22] **THE WITNESS:** 35 years about.

[23] **Q:** Has your wife ever worked at any of the  
[24] GM Saginaw foundries?

[25] **A:** No.

REDACTED

Page 6

Page 8

[1] respond to my questions, make sure you verbalize your  
[2] answers. You must actually say something. You can't  
[3] shake your head or nod your head or go um-humm because  
[4] the Court Reporter cannot take down what we're saying.  
[5] And by the way, she's taking down everything we're  
[6] saying. Okay?

[7] **A:** Okay.

[8] **Q:** The next thing is when I ask you  
[9] questions, let me finish my question before you answer,  
[10] even if you can anticipate what I'm going to say,  
[11] because it's hard for the Court Reporter to take down  
[12] when we're both talking. Okay? So let me finish my  
[13] questions and I'll let you finish your answers.

[14] Also when you respond to one of my  
[15] questions or one of the other attorneys' questions,  
[16] we'll assume that if you give us an answer, that you  
[17] understood the question. So if at any time you don't  
[18] understand a question, ask us to clarify it or try to  
[19] explain it to you. We'll be glad to do that. Okay?

[20] **A:** Okay.

[21] **Q:** And also if at any time you need a  
[22] break, you feel tired or whatever, just tell us and  
[23] we'll let you take a little break. Okay?

[24] Sir, what's your full name?

[25] **A:**

REDACTED

[1] **Q:** Do you have any children?

[2] **A:** Three.

[3] **Q:** Do any of them work at any of the GM  
[4] foundries?

[5] **A:** No.

[6] **Q:** What's the last grade you've completed  
[7] in school?

[8] **A:** Other than schools from General Motors?

[9] **Q:** Just, I mean, school as in —

[10] **A:** 12th grade.

[11] **Q:** You have a high school degree?

[12] **A:** High school, yes.

[13] **Q:** Do you have any other type of formal  
[14] education or training?

[15] **A:** General Motors Institute for hydraulics  
[16] class. And then Delta College for welding and turning  
[17] of the trades, I guess you'd call it, where we went  
[18] from pipe fitters to millwright welder.

[19] **Q:** Okay. What year did you graduate high  
[20] school?

[21] **A:** 1959.

[22] **Q:** Did you ever serve in the military?

[23] **A:** No.

[24] **Q:** After you graduated high school, did you  
[25] have any jobs before you started at Grey Iron?

REDACTED

Vol. 1, December 8, 1997

20TH CENTURY GL

Page 9

Page 11

[1] A: Yes.  
 [2] Q: What were those jobs?  
 [3] A: I worked part-time at Arrowcraft Boats.  
 [4] Q: What year was that?  
 [5] A: '59 and then probably maybe '58 when I  
 [6] was still in high school. It was just summertime.  
 [7] Q: What did you do there?  
 [8] A: Production boat, working on boats,  
 [9] aluminum boats.  
 [10] Q: When you were engaged in the production,  
 [11] exactly what were you doing?  
 [12] A: Sometimes we were riveting, sometimes  
 [13] washing the boats, inspection, things like that.  
 [14] Q: What was your next job after that?  
 [15] A: I worked at Lennox Junkyard.  
 [16] Q: What did you do there?  
 [17] A: I was an operator, machine operator that  
 [18] crushed cars.  
 [19] Q: How long did you do that for?  
 [20] A: Three years.  
 [21] Q: So approximately till 1963?  
 [22] A: Till '63.  
 [23] Q: At either of those jobs, the working for  
 [24] the boat company and the Lennox Junkyard, do you  
 [25] believe you were exposed to any asbestos?

[1] processing. I think it went with your badge number or  
 [2] something, but I couldn't tell you the department.  
 [3] Q: Was it in the core room?  
 [4] A: Core room, right.  
 [5] Q: Do you remember which foundry it was in?  
 [6] A: Well, the Grey Iron Foundry.  
 [7] Q: I mean, is there a specific department  
 [8] in the foundry?  
 [9] MR. DAVIS: He's looking for the  
 [10] department number? Was it 1, 2 or 3 or —  
 [11] A: Well, it was the 2 core room mostly.  
 [12] Q: Okay. Can you describe to me what you  
 [13] were doing when you were working in core processing,  
 [14] what your typical activities would be?  
 [15] A: Well, most of the time it was just  
 [16] handling the cores from the overhead to somebody that  
 [17] was either going to put them on the line or on-to  
 [18] another overhead.  
 [19] Q: During this time period from 1963 to  
 [20] 1966, did you work overtime?  
 [21] A: Yes.  
 [22] Q: When you worked overtime, did you do the  
 [23] same type of job or did you do something different?  
 [24] A: Sometimes, once in a while you'd work  
 [25] other jobs. If the foreman asked you if you want to

Page 10

Page 12

[1] A: No.  
 [2] Q: And then in 1963 you started at Grey  
 [3] Iron, is that correct?  
 [4] A: Correct.  
 [5] Q: Do you remember your starting date?  
 [6] A: September the 18th.  
 [7] Q: What was your first job when you started  
 [8] at Grey Iron?  
 [9] A: Core processing.  
 [10] Q: Do you know how many years you did that  
 [11] for?  
 [12] A: Almost three years.  
 [13] Q: So till sometime in middle 1966?  
 [14] A: Right.  
 [15] Q: Summertime-ish?  
 [16] A: It was — I went on maintenance the day  
 [17] after — well, the weekend after Thanksgiving weekend,  
 [18] which would have been —  
 [19] Q: Almost December?  
 [20] A: Yes, I remember it was a Tuesday or  
 [21] something like that.  
 [22] Q: What department were you working in when  
 [23] you were working in core processing?  
 [24] A: Core processing. They had a number. I  
 [25] don't know what the number would be. It was just core

[1] work four hours over, he might send you out to a  
 [2] foundry and sweep floors or something out there, you  
 [3] know. But not — you never knew. Most of the time  
 [4] it's the same job, though.  
 [5] Q: It's a fair statement most of the time  
 [6] you were still working the same job you were working  
 [7] your regular 40 hours and occasionally they'd send you  
 [8] to do something different?  
 [9] A: Yes. If they wanted you to work a  
 [10] double shift, you'd just say, "Yes, I'll stay right  
 [11] here."  
 [12] Q: What shift did you normally work when  
 [13] you worked in core processing?  
 [14] A: Second.  
 [15] Q: And then in 1966, you changed your job.  
 [16] What was your next job?  
 [17] A: EIT pipe fitter.  
 [18] Q: And that's an employee in training?  
 [19] A: Employee in training.  
 [20] Q: How many years were you an EIT?  
 [21] A: At that time you had to be — before  
 [22] they'd give you "A" wages, you had to be there eight  
 [23] years.  
 [24] Q: "A" wages, does that mean a journeyman  
 [25] pipe fitter wage?

**ABERNATHY v.  
20TH CENTURY GLOVE CORPORATION**

Vol.

Page 13

Page 15

[1] A: Journeyman, right. But you worked by  
[2] yourself in less than a year after.  
[3] Q: So you were an EIT until approximately  
[4] 1974?  
[5] A: Right.  
[6] Q: And when you were employee in training  
[7] pipe fitter, did you work plant wide, wherever there  
[8] was pipes?  
[9] A: Plant wide, yes, right.  
[10] Q: Did you work any specific shift?  
[11] A: Third shift most of the time.  
[12] Q: I guess can you briefly describe your  
[13] duties as a pipe fitter, if you can briefly?  
[14] A: Just plant wide as far as weekend work,  
[15] you had to watch everything as far as weekend when  
[16] there wasn't anybody there. Watch for your high water  
[17] in certain basement areas.  
[18] And then your regular job would be  
[19] either working on a line as a pipe fitter on that line.  
[20] And if you weren't on the line, then you went around  
[21] and put on pipe covering and tore old covering off that  
[22] wasn't any good, if they were going to take the line  
[23] out and throw it away. But that's what we did on  
[24] weekends mostly, was just change pipe covering and take  
[25] out old pipe.

Page 14

[1] Q: Okay. So when you worked overtime on  
[2] the weekends, you worked as a pipe fitter and you said  
[3] you changed the pipes. In your regular 40-hour week,  
[4] what would your activities be as a pipe fitter?  
[5] A: Usually an operator on the line.  
[6] Q: And what exactly does that mean, an  
[7] operator on the line?  
[8] A: Well, the line would run production.  
[9] And if it broke down for any reason, other than like a  
[10] cylinder would break or something like that, you'd have  
[11] to change that cylinder. Or if a water line would  
[12] break, you'd have to fix that. So anything concerning  
[13] pipe fitting, that's what you done.  
[14] Q: Okay. I just wondered.  
[15] MR. DAVIS: Kind of like spot  
[16] repair.  
[17] THE WITNESS: Right. If a cylinder  
[18] broke, say a big cylinder that would sweep the line  
[19] off, that cylinder broke and it wouldn't sweep the  
[20] line, they'd have to bring a couple people over there  
[21] and sweep it off by hand while I hurried up and changed  
[22] that cylinder that did that job.  
[23] Q: And then in 1974 you became a journeyman  
[24] pipe fitter?  
[25] A: Right.

[1] Q: How long were you employed at Grey Iron  
[2] as a journeyman pipe fitter?  
[3] A: Well, until I retired in 1988.  
[4] Q: And also while you were a journeyman  
[5] pipe fitter, did you work plant wide?  
[6] A: Plant wide.  
[7] Q: Was there any specific department that  
[8] you were assigned to when you were a pipe fitter?  
[9] A: Well, you were changed every so often.  
[10] I worked on like a line named 14 conveyor for three  
[11] years. Then I might have worked in the core room as a  
[12] pipe fitter. Back in core room, same place I did  
[13] before, but as a pipe fitter for two or three years and  
[14] then maybe out in the cleaning room for two or three  
[15] years, wherever they had to have you.  
[16] Q: So it's a fair statement you worked  
[17] basically plant wide throughout different time periods?  
[18] A: Plant wide most of the time.  
[19] Q: Is that correct?  
[20] A: Correct.  
[21] Q: During your time from, I guess at any  
[22] time when you were working at Grey Iron, was there any  
[23] time period when you were either laid off or there's a  
[24] strike or you were injured for an extensive period of  
[25] time?

Page 16

[1] A: I think we had — boy, I think we were  
[2] laid off for one week during deer season once. And it  
[3] was a voluntary layoff. If you wanted to take it, you  
[4] could, so I took it for deer season once.  
[5] Q: You never missed any work for an injury?  
[6] A: And I broke my toe one time and I don't  
[7] think I missed any time then, I just broke my toe.  
[8] That was it.  
[9] Q: Did you break it at work?  
[10] A: Yes.  
[11] Q: How did you break it at work?  
[12] A: Piece of iron fell on it when we were  
[13] tearing the foundry down. And then I was off work for  
[14] a couple of weeks when I broke my wrist, but I did that  
[15] at home.  
[16] Q: Do you remember what year that would  
[17] happen to be when you broke your wrist?  
[18] MR. DAVIS: You can't look at your  
[19] backup back there. If you can't remember —  
[20] Q: Yes. If you can't remember, that's  
[21] fine.  
[22] A: My kids were small, so let's see. My  
[23] daughter is 30 years old now. It had to be — I can't  
[24] remember.  
[25] Q: Okay. From the time period in 1963 to

REDACTED

Vol. 1, December 8, 1997

20TH CENTURY GIL WR GRACE-PIQ 001779-053

Page 17

Page 19

[1] 1966 when you were working in core processing, do you  
[2] believe you personally used any asbestos-containing  
[3] products?

[4] A: When you were in core processing?

[5] Q: Yes, just those three years?

[6] A: Used it or been around it?

[7] Q: Products that you personally would have  
[8] used yourself?

[9] MR. DAVIS: He'll get —

[10] Q: I'm going to break it down. I'm first  
[11] asking products you personally used and then later I'm  
[12] going to ask you products that were around you that you  
[13] may not have used, like others may have been using.

[14] A: Well, core processing, I would say no.

[15] Used, you said?

[16] Q: Yes. Correct.

[17] A: Right.

[18] Q: Okay. Also from 1963 —

[19] A: Well, I got to back that up again. If  
[20] gloves — we wore gloves when we handled this hot cores  
[21] and stuff. Yes, we could have used asbestos gloves.

[22] Q: Do you believe those contained asbestos?

[23] A: Yes, I think so.

[24] Q: Any other products that you believe you  
[25] personally used during that three-year time period?

[1] A: No, I can't think of anything right now.

[2] Q: Do you know a product name or  
[3] manufacturer of these curtains?

[4] A: I can't think, no.

[5] Q: Where exactly were these curtains?

[6] A: Well, they would be hanging, like they  
[7] had these big ovens that they put stuff in. And then  
[8] the truckers would put the cores into these big ovens  
[9] and they had curtains hanging down to keep the heat in  
[10] there or the Mahone oven, I guess they called it, had  
[11] big curtains to keep you from the heat from coming out  
[12] onto you, you know, because you work on overhead right  
[13] beside it.

[14] Q: And what department was this in?

[15] A: Core room.

[16] Q: From 1966 until 1974 when you were an  
[17] EIT pipe fitter, do you believe you personally worked  
[18] with any asbestos-containing products that you  
[19] personally used?

[20] A: Oh, yes. Yes.

[21] Q: Can you name me some of the types of  
[22] products that you used?

[23] A: We had to — at first we worked in the  
[24] shop for a while and we had to repack pumps, so you  
[25] used that like Garlock packing. And then a lot of

Page 18

Page 20

[1] A: Maybe an apron. We used to wear aprons.

[2] Q: You say maybe. Are you sure that —

[3] A: I'm not sure, but I would say they were  
[4] asbestos aprons that we used to wear for the heat.

[5] Q: Were there any other products you  
[6] believe you used that contained asbestos for that  
[7] three-year time period?

[8] A: That would be it.

[9] Q: Do you know a product name or  
[10] manufacturer of the gloves you wore?

[11] A: No, I can't remember any names.

[12] Q: Do you recall a product name or  
[13] manufacturer of the aprons that you wore?

[14] A: No.

[15] Q: Also from that same three-year time  
[16] period, do you believe you worked around asbestos-  
[17] containing products?

[18] A: Well, yes, I'm sure we did.

[19] Q: Do you know any by type?

[20] A: It had to be like the curtains that kept  
[21] the heat away from you.

[22] Q: Anything else?

[23] A: You're talking about just this three-  
[24] year period that I worked on production?

[25] Q: Yes.

[1] times, you had to go out and work on a job like a steam  
[2] valve and you had to go in and get a gasket, asbestos  
[3] type gasket.

[4] Q: Any other types of products you  
[5] personally believe you used besides the packing and the  
[6] gaskets?

[7] A: Well, on weekends, mostly weekends, we  
[8] done a lot of tearing off pipe covering and putting new  
[9] covering on. So we used a lot of pipe covering and  
[10] that insulating cement, you know, kind of stuff that  
[11] you mixed up to put on the elbow, make an elbow.

[12] Q: You believe the pipe covering and the  
[13] cement contained asbestos?

[14] A: Yes.

[15] Q: Any other products that you believe you  
[16] personally used from 1966 till 1974 that you believe  
[17] contained asbestos?

[18] A: Well, you still wore gloves at that  
[19] time, depending on what you were doing.

[20] Q: Any other products?

[21] A: I don't remember.

[22] Q: Do you recall any other product names or  
[23] manufacturers of this packing, other than the one you  
[24] already mentioned?

[25] A: Packing, you mean?

**ABERNATHY v.  
20TH CENTURY GLOVE CORPORATION**

Vol.

Page 21

[1] Q: The packing, yes.  
[2] A: Let's see. There was the Garlock. Boy,  
[3] I can't remember the name right now. My mind went  
[4] blank.  
[5] Q: Okay. If at any time you remember that  
[6] name, feel free to tell me or any of the attorneys.  
[7] You said this packing was used on pumps. Can you give  
[8] me a little more detail about how this packing would be  
[9] used on pumps?  
[10] A: Well, a lot of pumps had to have —  
[11] there was a shaft that went through to drive the pump.  
[12] And you had to put packing — the packing would wear  
[13] out and you would go into the stockroom and buy out  
[14] this packing and cut it the size of that shaft and then  
[15] stick it into that pump and push it in there. There  
[16] may be five different layers of it.  
[17] And then put the steel on it and  
[18] take the bolts down so that pump wouldn't leak water or  
[19] whatever it was they used to use. Now I can't remember  
[20] the name of the stuff, but it was stuff that run  
[21] through the pipes to mix with the sand. And those  
[22] pumps had to have packing in them to keep the water and  
[23] whatever they used in the pumps from running out.  
[24] Q: So this packing is used to prevent  
[25] leaks, whether it be water or any other type of pump —

[1] A: Right.  
[2] Q: And this was all used on pumps?  
[3] A: Well, pumps and — mostly pumps, yes.  
[4] Maybe even speed reducers or something like that that  
[5] held oil, you know.  
[6] Q: You also mentioned that you used  
[7] gaskets. Do you know a product name or manufacturer of  
[8] the gaskets?  
[9] A: The steam gasket. I can't remember what  
[10] the name of the gasket is for sure. Probably a Garlock  
[11] gasket. My best memory, it would be Garlock.  
[12] Depending on what size steam pipe you worked on, if you  
[13] had to change a steam valve, you had to put a gasket  
[14] in.  
[15] Q: Can you physically describe the gasket?  
[16] A: Most of those gaskets were — they were  
[17] — a lot of your steam gaskets were asbestos gasket.  
[18] The size of, say, a four-inch pipe. And a lot of them  
[19] had a copper ring inside and then your gasket and then  
[20] squeeze together. It had to be a certain type to use  
[21] for steam because they were high pressure.  
[22] Q: Okay. Do you remember any other names  
[23] of the product or manufacturer of the gaskets, other  
[24] than the one you've just mentioned?  
[25] A: I can't think of any. It's been a long

Page 22

Page 24

[1] A: Right.  
[2] Q: — from, I guess, if it had a leak or a  
[3] fracture, whatever, this was used to —  
[4] A: Right.  
[5] Q: — prevent the leak?  
[6] A: We did an awful lot of that. Instead of  
[7] changing the whole pump, you just fixed what was  
[8] leaking on it.  
[9] Q: Can you describe — what color was this  
[10] packing?  
[11] A: Oh, there was some of it that was — the  
[12] easiest way to describe some of it was it was scaly and  
[13] smelled like fish even, some of it. I can't remember  
[14] the name of it. I remember that part. It was real  
[15] tacky on your fingers, you know.  
[16] Q: It must have been fun to work with?  
[17] A: It really smelled terrible. It was a  
[18] fishy smell. That's one of them. But the Garlock  
[19] would be like a rope. And then there was some of it  
[20] that was already — you could buy it right out of stock  
[21] that was already pre-cut and pre-sized to where you could  
[22] just buy a little thing of it and put it right in the  
[23] pump, five pieces or whatever.  
[24] Q: So you used numerous different kinds of  
[25] packings?

[1] time.  
[2] Q: Yes, I understand. Do you know any  
[3] product name or manufacturer of the pipe covering you  
[4] used?  
[5] A: Corning is a name. And it seems to me  
[6] it's a Mansfield of some sort I seen on a box, but I  
[7] can't remember too much on — we used to just go buy it  
[8] out all the time, you know. What I mean by buying it  
[9] out, going to the stockroom and get it.  
[10] Q: And this pipe covering, what type of  
[11] pipes was this pipe covering put on?  
[12] A: Anywhere from half-inch pipe on up to 8,  
[13] 10, 12-inch pipe.  
[14] Q: Did this pipe carry water? Did it carry  
[15] different things?  
[16] A: Slurry. That was the name I wanted to  
[17] use before, slurry lines, water lines, steam lines. I  
[18] don't think they had paint lines in there, just mostly  
[19] was your water lines and —  
[20] Q: What's a slurry line?  
[21] A: It was a mixture that they used to add  
[22] with the sand to make the core with. It looked like  
[23] mud, a black mud.  
[24] Q: Do you recall any other names of product  
[25] name or manufacturer for the pipe covering other than

REDACTED

Vol. 1, December 8, 1997

20TH CENTURY GL

Page 25

Page 27

[1] the two you mentioned?  
 [2] A: I can't think of any right now.  
 [3] Q: You also mentioned a cement that you  
 [4] used that you put on the pipes. Do you know a product  
 [5] name or manufacturer of the cement?  
 [6] A: I can't really think of anything —  
 [7] you're talking about the type that you mixed up that  
 [8] looked like a —  
 [9] Q: I'm asking you the cement that you  
 [10] mentioned that you put on the pipe that you said you  
 [11] believe contained asbestos. That's the one I'm asking  
 [12] about.  
 [13] A: Yes. I can't think of the name of it,  
 [14] but I can tell you it was like sparkly. It looked like  
 [15] paper mache' type stuff. It didn't mix up like a  
 [16] cement that you use.  
 [17] Q: When it hardened, I guess when it dried,  
 [18] did it get like real hard —  
 [19] A: It was pretty hard.  
 [20] Q: — being like cement? Was it like —  
 [21] A: It was like plaster board. That's the  
 [22] best thing I can tell you, almost like plaster.  
 [23] Q: And where would you place the cement on  
 [24] the pipes?  
 [25] A: On the elbows from where the pipe

[1] A: Yes.  
 [2] Q: Why don't you list me the types of those  
 [3] products?  
 [4] A: Oh, around the sprays like, the stuff  
 [5] that they used to spray on it.  
 [6] Q: You believe that contained asbestos?  
 [7] A: Yes, that was an insulating, Cafco, C-a-  
 [8] f-co.  
 [9] Q: And what was this?  
 [10] A: It was a spray that they used like on a  
 [11] furnace, on 14 conveyor. They would spray it on there  
 [12] if there was a hot spot or something like that, you  
 [13] know.  
 [14] Q: Are there any other products that you  
 [15] believe you worked around that contained asbestos?  
 [16] A: Worked around? That's about all as far  
 [17] as working around it. I mean, I never worked with it,  
 [18] right.  
 [19] Q: Okay. That's the only product you can  
 [20] remember?  
 [21] A: That's all I can remember.  
 [22] Q: Who's the one who used the spray, what  
 [23] workers?  
 [24] A: You want names of a worker?  
 [25] Q: Well, sure, in a second, but I guess

Page 26

Page 28

[1] covering wouldn't fit.  
 [2] Q: You also mentioned that you believe you  
 [3] worked with gloves that you believe contained asbestos.  
 [4] Were these the same gloves you previously mentioned  
 [5] that you used when you worked in core processing?  
 [6] A: Yes. You get them right out of the  
 [7] stockroom.  
 [8] Q: And you don't know the name or  
 [9] manufacturer or product name for those gloves, do you?  
 [10] A: No.  
 [11] Q: Are there any other products that you  
 [12] believe you personally used during that eight-year time  
 [13] period from 1966 to 1974 besides the piping, gaskets,  
 [14] pipe covering, cement and gloves?  
 [15] A: I didn't use it, as far as me using it,  
 [16] but —  
 [17] Q: I'm going to get to that next.  
 [18] A: Okay.  
 [19] Q: Those are the only products you believe  
 [20] you personally used?  
 [21] A: Yes.  
 [22] Q: Okay. During that same time period,  
 [23] those eight years when you were in EIT, do you believe  
 [24] you worked around asbestos-containing products that  
 [25] contained asbestos?

[1] what classification were these workers?  
 [2] A: Well, they were cupola repairmen or  
 [3] furnace repair. I guess the furnace repair and the  
 [4] cupola repair were both probably listed at the same job  
 [5] classification.  
 [6] Q: And you said this was used on hot spots  
 [7] in furnaces?  
 [8] A: Yes.  
 [9] Q: What department would that be in?  
 [10] A: Well, it depends on — it would be in  
 [11] the foundry department or the cupola department. They  
 [12] had furnaces in both departments. In the foundry  
 [13] department, they were called holding furnaces.  
 [14] Q: Okay. From 1974 and I'm going to cut it  
 [15] off to 1980 when you were a journeyman pipe fitter, do  
 [16] you believe you also worked with and around asbestos-  
 [17] containing products?  
 [18] A: Oh, yes.  
 [19] Q: Were these the same products that you've  
 [20] just mentioned to me that you used while you were an  
 [21] EIT pipe fitter?  
 [22] A: Right.  
 [23] Q: Were there any additional products that  
 [24] you believe you used in this six-year time period?  
 [25] A: I think I've just told you about

**ABERNATHY v.  
20TH CENTURY GLOVE CORPORATION**

Vol.

Page 29

Page 31

[1] everything right there.

[2] Q: Were there any products that you  
[3] previously listed that you did not use in this last  
[4] six-year period from 1974 to 1980?

[5] A: No.

[6] Q: So you used exactly the same products  
[7] while an EIT —

[8] A: The same.

[9] Q: Let me try to finish so the Court  
[10] Reporter can get this down. So you used the same  
[11] products while a journeyman pipe fighter as you did  
[12] when you were an EIT, as you previously mentioned,  
[13] correct?

[14] A: Correct.

[15] Q: While you were working at Grey Iron, did  
[16] you ever see any independent contractors come in and do  
[17] work at the foundry?

[18] A: Oh, yes, a lot of them.

[1] jiggers and stuff like that that we couldn't handle,  
[2] they had outside contractors come in and put them in.

[3] Q: Also working at Grey Iron, do you recall  
[4] any suppliers that brought stuff to the foundry? And  
[5] what I mean by suppliers, not somebody that actually  
[6] manufactured a product, that's usually kind of like a  
[7] middle man that would actually bring it from the  
[8] manufacturer to Grey Iron?

[9] A: You mean did I actually see a truck come  
[10] in like Unirubber Company or something like that?

[11] Q: Whatever, yes. Whatever company —

[12] A: Delivered the asbestos pipe covering?

[13] Q: Yes, sure, the supplier.

[14] A: I wouldn't have seen that, no.

[15] Q: Did you ever work at any of the other  
[16] Saginaw foundries while working?

[17] A: No.

[18] MR. DAVIS: You mean like Nodular

[21] A: Oh, you want electrical or —

[22] Q: Whatever. Whatever you can remember,  
[23] independent contractors?

[24] A: Green. Boy, there was so many  
[25] contractors in there. Champagne and Marx, they worked

[21] Q: And you retired in 1988. Was that a  
[22] regular retirement?

[23] A: What do you mean by regular retirement?

[24] Q: You just had enough years in and you  
[25] quit or you retired?

Page 30

Page 32

[1] in there. Many, many truck haulers.

[2] Q: Do you remember any names? Let me stop  
[3] here. When I say truck haulers, are these people — I  
[4] guess independent contractor is somebody that would  
[5] actually be somewhere in the foundry actually doing  
[6] work?

[7] A: I can't remember too many names on them,  
[8] but we had a lot of contractors in there.

[9] Q: What did Green do?

[10] A: It seemed to me as though they were  
[11] electrical, a lot of electrical, but I'm not sure on  
[12] that either. I just can't think of any names right  
[13] now.

[14] Q: And this Champagne and Marx, what did  
[15] they do?

[16] A: Trucking, hauling in, hauling out.

[17] Q: Okay. Did they actually do work in the  
[18] foundry or they were just kind of like a supplier?  
[19] They'd bring products to and from the —

[20] A: Well, they did work in the foundry,  
[21] putting in machines and stuff like that. I mean, had  
[22] to haul out the dirt in order to put the machines in.  
[23] Some of them put in machines, too.

[24] Q: What type of machines would they put in?

[25] A: Core machines, great big jiggers,

[1] A: More or less, yes.

[2] Q: When you say more or less, was there a  
[3] reason why you retired?

[4] A: Well, my health wasn't the best and so I  
[5] took the — I had my 25 years in, so I took it.

[6] Q: Sir, did you have a nickname while you  
[7] worked at Grey Iron?

[8] A: Yes.

[9] Q: What was your nickname?

[10] A: Dirty George.

[11] Q: I shouldn't ask this, but —

[12] A: Off the record, I can tell you why, if  
[13] you want.

[14] MR. KAFIS: Okay. We'll save it  
[15] for after the record.

[16] I believe those are all the  
[17] questions I have for you right now. But I'm  
[18] sure some of the other attorneys will have some other  
[19] questions for you. Thanks.

**EXAMINATION**

**BY MS. JACQUE:**

[22] Q: , my name is Onnie Jacque. How  
[23] are you doing today?

[24] A: Good today.

[25] Q: I have a couple questions I'd like to

REDACTED

REDACTED

Vol. 1, December 8, 1997

20TH CENTURY GLC

Page 33

[1] ask you. From 1963 until 1966 when you were working in  
 [2] the core room as a core processor, you said you worked  
 [3] around some curtains. Do you recall what those  
 [4] curtains looked like?  
 [5] A: Just big gray curtains. That's all I  
 [6] can remember.  
 [7] Q: Did you ever have occasion to touch  
 [8] them?  
 [9] A: Oh, yes, if you had to.  
 [10] Q: Do you know what they felt like, the  
 [11] texture of them?  
 [12] A: Kind of like a rug.  
 [13] Q: A rug. Were they a heavyweight curtain?  
 [14] A: Yes.  
 [15] Q: Did you notice any tags or labels on the  
 [16] curtains?  
 [17] A: No.  
 [18] Q: No. Did you ever see how the curtains  
 [19] came packaged?  
 [20] A: No.  
 [21] Q: Do you know if they came on a roll?  
 [22] A: I can't remember.  
 [23] Q: You only saw them hanging?  
 [24] A: Yes.  
 [25] Q: And from 1966 until 1974 when you were

Page 35

[1] steam pipe?  
 [2] A: Steam pipes.  
 [3] Q: Were they used for any other —  
 [4] A: Well, you had to use a gasket for water  
 [5] lines and wherever a valve went in on a welded pipe.  
 [6] Q: So they were not only used for steam  
 [7] pipes, but they were used for other types of piping?  
 [8] A: Right.  
 [9] Q: Were they used for any other purpose?  
 [10] A: You mean for —  
 [11] Q: Were they used for anything other than  
 [12] piping the gaskets?  
 [13] A: Gaskets were — water gaskets were used  
 [14] for gaskets for either steam, water, gas, oxygen,  
 [15] whatever kind of line you happen to run.  
 [16] Q: So these same rubber gaskets were used  
 [17] for —  
 [18] A: Same asbestos gaskets.  
 [19] Q: Okay. How do you know that these  
 [20] gaskets contained asbestos?  
 [21] A: You could see it. You could see the  
 [22] sparkly stuff in it.  
 [23] Q: Did you ever see the gaskets come in  
 [24] their packaging?  
 [25] A: You mean you had to take the packages

Page 34

[1] an EIT pipe fitter, you indicated that you worked with  
 [2] some gaskets. What color were these gaskets?  
 [3] A: Most of them were white.  
 [4] Q: They were white. Were they prefab?  
 [5] A: You're talking made at the factory, made  
 [6] at a shop and then brought to the factory.  
 [7] Q: Brought to the foundry?  
 [8] A: Brought to the foundry, right.  
 [9] Q: Were they already pre-cut?  
 [10] A: Right.  
 [11] Q: What sizes did they come in?  
 [12] A: You could get them from 12 inch all the  
 [13] way down to small, half inch.  
 [14] Q: Half inch. Were they thick?  
 [15] A: No, not —  
 [16] Q: So the diameter you're saying was 12  
 [17] inch?  
 [18] A: Right.  
 [19] Q: One half an inch to 12 inch?  
 [20] A: Right.  
 [21] Q: And the width or how thick — were they  
 [22] thin, like discs?  
 [23] A: They were probably just anywhere from a  
 [24] 16th to a quarter inch thick at the very most.  
 [25] Q: And you'd said that they were used for

Page 36

[1] out?  
 [2] Q: When you got the gasket, how did you get  
 [3] it?  
 [4] A: Depending on the gasket. We just went  
 [5] to the stockroom and took a requisition up there and  
 [6] asked for a certain size gasket and the stockroom man  
 [7] brought it out to you.  
 [8] Q: Okay. When you got the gasket from the  
 [9] stockroom, was it in packaging or was it just open?  
 [10] A: Most of the time it was just open.  
 [11] Q: So did you ever see the gaskets in their  
 [12] packaging when they came to the foundry?  
 [13] A: No, not the gaskets so much. No.  
 [14] Q: So you don't know if they came in a box  
 [15] or they came in shrink wrap or —  
 [16] A: No.  
 [17] Q: — anything like that?  
 [18] A: We always ordered them by the piece.  
 [19] Q: By the piece?  
 [20] A: As many as we needed.  
 [21] Q: You'd take a requisition and go to the  
 [22] crib and say, "I need ten gaskets or one gasket?"  
 [23] A: Right.  
 [24] Q: The gaskets that you used, were they all  
 [25] white?

**ABERNATHY v.  
20TH CENTURY GLOVE CORPORATION**

Vol. 1

Page 37

Page 39

[1] A: No, there were some of them gray, gray  
[2] looking.  
[3] Q: Were there any — were they any other  
[4] color other than white or gray looking?  
[5] A: I don't recall.  
[6] Q: Other than the manufacturer that you  
[7] named, I know you said you couldn't recall at the time,  
[8] have you thought of the name of any other manufacturers  
[9] of gaskets?  
[10] A: I can't think of them, no.  
[11] Q: Other than the sparkly stuff you  
[12] indicated that you saw in the gaskets, is there any  
[13] other knowledge that you have that makes you believe  
[14] that these gaskets contained asbestos?  
[15] A: No.  
[16] Q: Did someone ever tell you or did you  
[17] ever talk with your co-workers about them?  
[18] A: No. We had no idea anything was wrong  
[19] with it at that time.  
[20] Q: Do you now know that the gaskets  
[21] contained asbestos?  
[22] A: That asbestos is dangerous, yes, I  
[23] really know for sure.  
[24] Q: Okay. But my question is, do you now  
[25] know or do you know now that the gaskets that you were

[1] you work every month?  
[2] A: We worked at least 60 hours a week.  
[3] Well, 56 hours a week almost all the time, seven days a  
[4] week. All the time from when I started on EIT right up  
[5] through till I retired. It was a seven day a week job,  
[6] other than maybe a few months they would say, "Well,  
[7] we're back to eight hours." We still worked weekends.  
[8] I got to say we worked overtime throughout the whole  
[9] time.  
[10] Q: Okay. Have you ever heard of a company  
[11] called United States Rubber?  
[12] A: Rings a bell, but I can't say.  
[13] Q: How about Uniroyal?  
[14] A: I've seen Uniroyal probably.  
[15] Q: Where did you see Uniroyal?  
[16] A: I've seen the name, possibly there,  
[17] possibly someplace else. I don't know for sure. I  
[18] know the name.  
[19] Q: Do you associate the name with anything  
[20] you may have seen at the foundry?  
[21] A: I can't say.  
[22] MS. JACQUE: Okay. I  
[23] don't have any other questions for you right now. I do  
[24] have some names I'd like to ask you about, but I'm  
[25] going to wait until the end until everyone has had a

REDACTED

Page 38

Page 40

[1] using contained asbestos?  
[2] A: I know now they do, yes.  
[3] Q: How do you know now?  
[4] A: Well, you just know what asbestos looks  
[5] like and I remember the — just from my own remembrance  
[6] of what it looks like.  
[7] Q: Okay. When you were a pipe fitter, did  
[8] you — the curtains that you saw when you were in the  
[9] core processing room when you were a core processor, do  
[10] you recall if you saw any of those curtains when you  
[11] were an EIT pipe fitter?  
[12] A: Well, I'm sure I saw them then, too,  
[13] yes, because we worked around it then. Then, of  
[14] course, we were plant wide so we worked all over.  
[15] Q: Okay. And does the same hold true when  
[16] you were a journeyman pipe fitter?  
[17] A: Right.  
[18] Q: What shift did you work as a journeyman  
[19] pipe fitter?  
[20] A: Third.  
[21] Q: Third shift. Did you work overtime as a  
[22] journeyman pipe fitter?  
[23] A: We worked overtime from the day I  
[24] started there till the day I retired.  
[25] Q: Did you work a lot of overtime or did

[1] chance. Okay?  
[2]  
[3] **EXAMINATION**  
[4] **BY MS. WINIARSKI:**  
[5] Q: Hi, sir. My name is Denise Winiarski.  
[6] You mentioned earlier when you were an EIT pipe fitter,  
[7] you mentioned some spray that was used on the furnace  
[8] and you called it Cafco?  
[9] A: It was a — what are you talking about?  
[10] Q: Is that a trade name or a manufacturer  
[11] name?  
[12] A: I think it's — most of the time it was  
[13] a manufacturer's name. The same as anything else you  
[14] bought out of stock, everything was mostly  
[15] manufacturer's name, named after whoever put it in  
[16] there.  
[17] Q: And the spray was — you said you saw  
[18] other people applying the spray in the cupola or the  
[19] foundry department. What were they spraying it with?  
[20] I mean, how was it being applied?  
[21] A: Well, it was — most of the time you  
[22] seen somebody with a long two-inch hose and it was  
[23] being pressurized sprayed onto the — whatever it had  
[24] to be applied to, you know, like the furnace or the  
[25] mouth of the furnace or the neck or — I don't know.  
You don't know what I'm talking about there but —

REDACTED

Vol. 1, December 8, 1997

20TH CENTURY GLC

Page 41

[1] Q: And the hose, where was the hose coming  
[2] from?  
[3] A: From the machine that they put the stuff  
[4] in.  
[5] Q: And you said the stuff, What kind of  
[6] stuff did they put in there, if you know?  
[7] A: It was like a — actually it looked like  
[8] a stone, small stone, gravelly type stuff.  
[9] Q: Do you remember the color?  
[10] A: Brownish.  
[11] Q: Do you know if it was mixed with  
[12] anything before —  
[13] A: Water. I would assume it was water.  
[14] Q: Did you ever see this product after it  
[15] was sprayed on the furnace?  
[16] A: You mean after it was on the furnace  
[17] itself?  
[18] Q: Right after it dried?  
[19] A: Yes. If you watched them spray it on  
[20] there, yes.  
[21] Q: Do you know what the texture was?  
[22] A: Kind of stony type, gravelish.  
[23] Q: Was it the same color after it was dry?  
[24] A: Yes, it was brown, gray looking.  
[25] Q: Some kind of a brownish gray. Now when

Page 43

[1] anything like that?  
[2] A: You mean like a mass of dust where you  
[3] couldn't see?  
[4] Q: Right.  
[5] A: Not that bad, but you could see, you  
[6] know, you could see them spray it on.  
[7] Q: And how far were you when it was being  
[8] sprayed, how far away from it?  
[9] A: It depends. If I wanted to talk to that  
[10] person, maybe I walked up and talked to him and stood  
[11] right beside him. I don't know.  
[12] Q: So you could stand right beside him  
[13] while it was being sprayed on the furnaces?  
[14] A: Yes, you could have.  
[15] Q: Now you said this was a stony material  
[16] that was put into this machine. Did you see how that  
[17] stony material came packaged?  
[18] A: I can't remember. It was like a brown  
[19] bag that I can think of, but I'm not positive. They  
[20] just put it in the machine and sprayed it out.  
[21] Q: So since you never worked with it, you  
[22] wouldn't know how heavy the bag was or anything like  
[23] that?  
[24] A: No.  
[25] Q: And you said you thought that this spray

Page 42

[1] this was being sprayed, who was spraying the, you know,  
[2] material? Was it GM employees?  
[3] A: Right.  
[4] Q: And you said it was the cupola repairman  
[5] or the furnace repairman?  
[6] A: Cupola repairman or the furnace  
[7] repairman.  
[8] Q: Do you know how many people would be  
[9] spraying this at one time?  
[10] A: No, I wouldn't know how many. Depending  
[11] on how many — time of day and who was, you know, I  
[12] wouldn't know another department out in the cupola if I  
[13] was working on the line so —  
[14] Q: Was this something that happened every  
[15] day? Did they spray this material every day?  
[16] A: Probably somebody did. Now where, I  
[17] don't know but I mean —  
[18] Q: You just might not have seen it every  
[19] day?  
[20] A: Yes, right.  
[21] Q: Now when it was sprayed, were there  
[22] other people in the department still working doing  
[23] their normal jobs?  
[24] A: Yes.  
[25] Q: Did the spray cause some sort of dust or

Page 44

[1] contained asbestos?  
[2] A: I would say it did, yes.  
[3] Q: Why do you believe it contained  
[4] asbestos?  
[5] A: Because it was an insulator.  
[6] Q: Because of the high heat in the furnace?  
[7] A: High heat, oh, yes. 3,000 degrees and  
[8] better.  
[9] Q: Was it also used in the cupolas?  
[10] A: Right.  
[11] MS. WINIARSKI: Thanks, sir.  
[12] That's all the questions I have right now.  
[13] MR. KITZMILLER: No questions.  
[14] EXAMINATION  
[15] BY MR. HEWITT:  
[16] Q: I just have a couple questions for you,  
[17]  
[18] MR. DAVIS: Let me slip back so you  
[19] can see.  
[20] Q: When you're talking about this spray  
[21] being used on the holding furnaces, were they spraying  
[22] it on the outside or the inside?  
[23] A: It depends. Depends on where the hot  
[24] spot would be, you know, if they had a —  
[25] Q: Were you ever in the area when they

REDACTED

**ABERNATHY v.  
20TH CENTURY GLOVE CORPORATION**

Vol.

Page 45

Page 47

(1) actually crawled inside the drum and sprayed it inside  
 (2) the holding furnace?  
 (3) A: I can't say I was there, no.  
 (4) Q: So you've seen it used on the outside of  
 (5) the holding furnace?  
 (6) A: Well, more or less on the outside. It  
 (7) wouldn't be right on the steel part on the outside.  
 (8) Q: That was my question. Are they spraying  
 (9) it on the shell or —  
 (10) A: No, it would be on — like where the  
 (11) iron is poured into the furnace or where it comes out  
 (12) on a trough, on something like that.  
 (13) Q: Okay. So this is like a material — do  
 (14) you know what a ramming mix is?  
 (15) A: Right.  
 (16) Q: Was this a ramming material that was  
 (17) being sprayed on?  
 (18) A: No. A ramming material was like kid's  
 (19) putty, clay. The ram material come in a thing and they  
 (20) took a hammer and rammed it.  
 (21) Q: Have you ever seen ramming material that  
 (22) was sprayed inside a furnace?  
 (23) A: I don't know if it's ramming material or  
 (24) not, no.  
 (25) Q: Do you know this material that you saw

(1) A: If you can remember back a few years  
 (2) ago, there was a pipe fitter that got killed on top of  
 (3) a furnace. And the reason for that was the iron pourer  
 (4) came down and dumped iron on top of it after a hose  
 (5) broke up on top. It spilled water on top of all that  
 (6) iron and it was steam.  
 (7) Q: Pressure built up and it made steam and  
 (8) it blew the door?  
 (9) A: And then the crane came down and poured  
 (10) more iron on top of that water and it blew up and  
 (11) killed that guy up there.  
 (12) Q: Right. Now, is the only reason you said  
 (13) you believe this material contained asbestos, because  
 (14) it was used as an insulator around the furnaces?  
 (15) A: Right.  
 (16) Q: Did anybody ever tell you or did you  
 (17) ever see anything that said it was asbestos containing?  
 (18) A: No.  
 (19) Q: Have you ever seen a spray on material,  
 (20) something that was shot out of a gun or a hose, used  
 (21) around the cupolas or furnaces that was a refractory  
 (22) material that did not contain asbestos?  
 (23) A: I don't know if it contained asbestos or  
 (24) not. I've seen them spray stuff out, yes, before the  
 (25) furnace was ever used.

Page 46

Page 48

(1) that was sprayed, was it coming in direct contact with  
 (2) the molten material? When they sprayed it on the  
 (3) troughs, are they spraying it on —  
 (4) A: They never — not on the iron itself.  
 (5) You couldn't mix — I mean, any time you mix water and  
 (6) iron together, you know, you wouldn't be around. You'd  
 (7) be blowed up.  
 (8) Q: Right. So where were they spraying  
 (9) this, on the mouths or on the troughs? Were they  
 (10) spraying it on the sides where it was not coming in  
 (11) contact?  
 (12) A: Right. Maybe up on the ceiling of it or  
 (13) something where you got a hot spot up there, but not  
 (14) directly right onto the iron. Because I don't know if  
 (15) you know it or not, but if you put iron and water  
 (16) together, you're going to have a bomb bigger than any  
 (17) dynamite you've ever seen.  
 (18) Q: So that being the case, would you say  
 (19) it's unlikely that they were spraying that stuff inside  
 (20) the drum of the holding furnace, since you don't want  
 (21) to use water in there?  
 (22) A: You can spray water on top of iron, but  
 (23) you cannot put iron on top of water. Do you understand  
 (24) what I'm telling you?  
 (25) Q: I think so. Okay.

(1) Q: Right. Right.  
 (2) A: You know, whether or not that was  
 (3) asbestos in it or not, I couldn't tell you.  
 (4) MR. DAVIS: We're talking about  
 (5) something different from what he's described  
 (6) previously.  
 (7) MR. HEWITT: Right.  
 (8) MR. DAVIS: Okay. Just so the  
 (9) record is clear.  
 (10) MR. HEWITT: All right. That's all  
 (11) the questions I have. Thanks.  
 (12) MR. DAVIS: I think just —  
 (13) MS. JACQUE: Nobody else has  
 (14) questions? Okay.

**RE-EXAMINATION  
BY MS. JACQUE:**

(15) Q: I have some names I'd like to  
 (16) ask you about. And if you'd like, I can give you a  
 (17) choice. I could either read them or give you the list  
 (18) and have you indicate if you know these people. Which  
 (19) would be easier?  
 (20) A: Give me the list. I'll show you.  
 (21) Q: Okay. You want to take a break.  
 (22) MR. DAVIS: Yes.  
 (23) THE WITNESS: Know the people?  
 (24)  
 (25)

20TH CENTURY GL

Page 49

Page 51

[1] Q: Just circle or check, whatever.  
 [2] A: Even if they're dead?  
 [3] Q: Yes.  
 [4] A: And you want to know if they're a  
 [5] foreman or if they're a —  
 [6] MR. DAVIS: Well, she'll ask you  
 [7] the questions.  
 [8] Q: Once you do that, we'll talk about who  
 [9] you know and how you know them.  
 [10] MR. DAVIS: We can go off the  
 [11] record.  
 [12] (Discussion held off the record.)  
 [13] Q: I just want the record to  
 [14] reflect that I handed you a list — several list of  
 [15] names of co-workers and Grey Iron plaintiffs and asked  
 [16] you to identify or indicate who you may know or may  
 [17] have worked with.  
 [18] We're going to read through this  
 [19] list of names just the people that you've identified.  
 [20] And we're going to assume that anyone that you haven't  
 [21] checked off, you don't know them or are not familiar  
 [22] with their name, is that correct?  
 [23] A: I'm not familiar with the name.  
 [24] Q: And I understand that a lot of people;  
 [25] (a) may have gone by nicknames or you may only know

[1] A: A lot of times.  
 [2] Q: Charles Aubin?  
 [3] A: He was a pipe fitter. I worked beside  
 [4] him many a times.  
 [5] Q: Thomas Bell?  
 [6] A: He was a foreman.  
 [7] Q: Did you ever work for him?  
 [8] A: Yes.  
 [9] Q: Do you know what department he was in?  
 [10] A: Maintenance.  
 [11] Q: Larry Bloom?  
 [12] A: I worked with him.  
 [13] Q: What was his job?  
 [14] A: He was a millwright.  
 [15] Q: Was he all over the foundry?  
 [16] A: Right.  
 [17] Q: Did you ever work side by side with him  
 [18] or in an area where he was working?  
 [19] A: In the same area, yes.  
 [20] Q: Robert Coe?  
 [21] A: He was a foreman.  
 [22] Q: He was your foreman?  
 [23] A: Yes.  
 [24] Q: What department were you in?  
 [25] A: Foundry.

Page 50

Page 52

[1] them by their face?  
 [2] A: Right.  
 [3] Q: Okay. Na'eem Abdullah is the first  
 [4] person you've indicated. How do you know Mr. Abdullah?  
 [5] A: I think he was some sort of a committee  
 [6] man at one time.  
 [7] Q: Did you know him by — he was also known  
 [8] as John Williams. Did you know him by that name?  
 [9] A: No.  
 [10] Q: You knew him by Abdullah?  
 [11] A: Yes.  
 [12] Q: Carl Alles?  
 [13] A: Alles.  
 [14] Q: Alles. How do you know Mr. Alles?  
 [15] A: He was a pipe filter.  
 [16] Q: Did you work with him?  
 [17] A: Yes.  
 [18] Q: Do you recall what years you may have  
 [19] worked with him?  
 [20] A: He worked there all the time I worked  
 [21] there, so it would be from — he had more seniority  
 [22] than I had.  
 [23] Q: Did you ever work side by side with him?  
 [24] A: Yes, many a time.  
 [25] Q: I'm sorry?

[1] Q: No. 2?  
 [2] A: Yes, he had to be in 2 foundry on the  
 [3] cupolas, too, cupolas mostly. I worked for him on  
 [4] weekends.  
 [5] Q: On the weekends?  
 [6] A: Right.  
 [7] Q: Gerald Frost, how do you know Mr. Frost?  
 [8] A: He was a welder.  
 [9] Q: Did you ever work with him?  
 [10] A: Yes.  
 [11] Q: What department?  
 [12] A: Maintenance. I think that guy's dead,  
 [13] isn't he?  
 [14] Q: I'm not sure. I don't know. Joseph  
 [15] Kostick?  
 [16] A: I knew him as a neighbor.  
 [17] Q: He was your neighbor?  
 [18] A: And a worker in the foundry.  
 [19] Q: Do you know what job he had?  
 [20] A: Millwright, I believe.  
 [21] Q: Did you ever work in a department where  
 [22] he was working?  
 [23] A: No, not real close, no.  
 [24] Q: Robert Kubczak?  
 [25] A: Went to school with him when we were

20TH CENTURY GLOVE CORPORATION

Vol

NR GRACE-PIQ 001779-062

Page 53

[1] kids.  
[2] Q: Did you ever work with him?  
[3] A: Yes, he was a millwright. But mostly he  
[4] worked at Nodular, but I did — I was around him a  
[5] little bit.  
[6] Q: How about his brother Thomas?  
[7] A: The name Thomas, I can't think of — I  
[8] thought it was Bob and I don't recollect the name  
[9] Thomas. Must be his real name, but I just don't  
[10] recollect that name through him. They were both  
[11] brothers. I went to school with them when we were  
[12] kids. They lived in ' with us.  
[13] Q: Did you know what job Robert Kubczak's  
[14] brother may have had?  
[15] A: I'm thinking pattern shop, but I'm not  
[16] sure.  
[17] Q: Okay. That's fine. Larry Lynch?  
[18] A: He was a tin knocker.  
[19] Q: A tin knocker?  
[20] A: Right. Or tin banger, whatever they  
[21] call it.  
[22] MR. DAVIS: Yes, yes.  
[23] Q: Joseph Mazzola?  
[24] A: He worked in the cupola department as a  
[25] laborer.

[1] you know.  
[2] Q: Okay. Paul Blanton, Sr., how do you  
[3] know —  
[4] A: He was a cupola worker, too.  
[5] Q: Was he a laborer?  
[6] A: Yes. I couldn't tell his actual status  
[7] of what he was, but I know he worked in the cupolas and  
[8] he wasn't in maintenance.  
[9] Q: Did you ever work around where he was  
[10] working?  
[11] A: No, I just knew him from —  
[12] Q: From the plant?  
[13] A: No.  
[14] Q: From the cupola department?  
[15] A: No, I knew the family from living in  
[16] Carlton.  
[17] MS. JACQUE: Okay. Sir, those are  
[18] all the questions that I have. Thank you very much.  
[19] RE - EXAMINATION  
[20] BY MS. WINIARSKI:  
[21] Q: I have one more question.  
[22] When you were talking about this  
[23] Cafco spray, how did you know it was called Cafco?  
[24] A: I just remember the name.  
[25] Q: Somebody used that name?

Page 54

[1] Q: L. C. Peoples?  
[2] A: He was a committee man.  
[3] Q: Harvey Pfeiffer?  
[4] A: He was foreman.  
[5] Q: He was —  
[6] A: No, wait a minute now. I might have  
[7] someone mixed up there. Is that Harold or Harvey?  
[8] Q: Harvey.  
[9] A: Was there two brothers there that —  
[10] Q: I don't know.  
[11] A: It doesn't have anything about Harold.  
[12] Q: I only have Harvey.  
[13] A: I may have him mixed up with his brother  
[14] if there's two of them. One was a foreman and one was  
[15] a worker.  
[16] Q: Okay. But do you know who Harvey is?  
[17] A: I know the name, put it that way. I  
[18] think there was a brother.  
[19] Q: Dennis Sprague?  
[20] A: Yes, he was a cupola worker.  
[21] Q: Was he a laborer?  
[22] A: Yes.  
[23] Q: Did you ever work in the area where he  
[24] was working?  
[25] A: No, but I just knew his wife and family,

Page 56

[1] A: I don't know.  
[2] Q: The name just sounds familiar to you?  
[3] A: I just remember the name.  
[4] Q: You never saw it anywhere or anything  
[5] like that?  
[6] A: Well, I probably had to see it on a box,  
[7] the same as — I'm trying to think of the name, like  
[8] wasn't it Pittsburgh or something that was on a box for  
[9] insulating? I mean, I just remember seeing it on a box  
[10] or something, you know.  
[11] MS. WINIARSKI: Okay. Thanks.  
[12] RE - EXAMINATION  
[13] BY MS. JACQUE:  
[14] Q: I have one more question, I'm sorry.  
[15] The gaskets that you used, did you  
[16] ever have to cut them to fit something?  
[17] A: Oh, yes. You're talking — a pipe  
[18] gasket was always made, but sometimes you had to make  
[19] gaskets yourself out of gasket material. What's the  
[20] name of the gasket material? I can't think of it right  
[21] now.  
[22] But we had a machine that you could  
[23] make your own gaskets out of. But a lot of times on  
[24] your steam gaskets, especially, you had to use store  
[25] boughten type. A lot of gaskets we did make ourselves

REDACTED

REDACTED

Vol. 1, December 8, 1997

20TH CENTURY GLO

Page 57

Page 59

[1] and we cut them and made circles, you know.  
 [2] Q: Would you personally cut it or would you  
 [3] put it in the machine and the machine would cut it?  
 [4] A: Well, we personally cut it. We had a  
 [5] cutting board with a little machine that you had a  
 [6] razor blade in and stick it in there and make a gasket,  
 [7] you made your own gaskets, you know.  
 [8] Q: When you cut the gasket material, did  
 [9] you ever notice any dust or anything emitting from the  
 [10] gasket material?  
 [11] A: The only thing you could notice was that  
 [12] fishy smell on some of them and the sparkle.  
 [13] Q: Were they rubberized gaskets or were  
 [14] they made out of other material?  
 [15] A: Some were, some weren't. I mean, there  
 [16] was some gaskets that was made out of rubber and some  
 [17] that was made out of just the white, I don't know what  
 [18] you'd call it, just like a white material.  
 [19] Q: Okay. The rubber gaskets, were they  
 [20] only used for the steam piping or the water —  
 [21] A: No, no. You never use rubber on steam.  
 [22] Q: What would you use the rubber gaskets  
 [23] for, water?  
 [24] A: On the slurry lines and stuff like that.  
 [25] MS. JACQUE: Okay. Thank you, sir.
